Detail-oriented data enthusiast with 1.6 years of experience in successful data migration project as a Programmer Analyst. Proficient in SQL, Power BI, Python, Excel and other data tools. I am poised to contribute to impactful data analysis projects. Possessing a strong background in statistical analysis, Problem-Solving, data visualization, and data-driven decision-making.

SKILLS

Programming – SQL, Python

Visualization - Power BI, Excel

Analytics –SQL, Excel, Pandas, DAX, Power Query

Database and Data warehouse - MS SQL Server, Snowflake

Other tools & skills - ETL, SSIS, Data Modeling, Data Warehousing, Azure, Jira/Confluence, Machine Learning

WORK EXPERIENCE

Cognizant

06/2022 – Present

10/2022 - 11/2023

- Programmer Analyst CIMS Migration Project
 - Analyzed and validated complex fact, ref, and dim tables having complex joins.
 - Handled large and complex Datasets (about **20 million** records).
 - Gained experience in handling and maintaining relationships with clients (Nike) with successful outcomes.
 - Designed and created multiple **SQL queries** for different methods in the **Data Validation** process. Validated around 100+ tables, rectifying defects promptly using **JIRA** as a tracker before the given timeframe.
 - Led a team of 8 members, realizing a 20% increase in efficiency, accuracy, and a 20% reduction in task timelines.
 - Conducted analysis and validation of data migrated from legacy (MS SQL Server) to the new system (Snowflake) using tools like MS SQL Server, SQL, Snowflake, and Excel (Vlookup, Xlookup, Pivot table, Conditional formatting, etc)
 - Sound knowledge of Scrum Methodologies, utilizing tools such as JIRA/Confluence board for support activities.

Programmer Analyst – MDF Migration Project

06/2022 - 10/2022

- Analyzed Facts, Dimensions, and exported SSIS packages.
- Completed and managed documents of STMs and volumetrics for Import, Staging, and load packages of facts and dimensions.
- Created and managed 30% of the ETL (Extract Transformation and Load) and STMs (Sources to Target mapping)
 documentation.

PROJECTS

CodeX Market Analysis

- Analyzed survey data around **10k records** from 10 Indian cities to provide demographic, consumer, and competitive insights for CodeX, a frictional German beverage company.
- Used data analytics (SQL, Python, Excel, Power Query) and visualization tools (Power BI) to perform EDA and to create reports and recommendations for marketing and product development strategies.
- Contributed to increasing brand awareness, market share, and purchase behaviour of CodeX's energy drink.

SQL Data Analysis

- SQL Case study challenge was to scrutinize customer visitation patterns, and spending habits, and pinpoint preferred menu selections.
- Gaining a deeper understanding of his customers, answering business questions that aimed to provide a personalized
 experience, and making informed decisions about expanding his customer loyalty program using SQL concepts like JOINs,
 CTE, Window Function, conditional statements etc.

Bicycle Sales Analysis

- This Power BI project highlighted the significance of data preparation, transformation (Python, Power Query) and data modelling (Power Pivot) thoughtful visualization design, and collaborative sharing.
- Creating a comprehensive **Power BI report and dashboard** for a fictional bicycle company to provide valuable insights into sales, profit, revenue, and other relevant metrics.

CERTIFICATIONS

- Microsoft Certified Power BI Data Analyst Associate
- Microsoft Azure Fundamental
